BORGES introduced

Who we are

BORGES is a traditional family enterprise currently in the third generation and solely managed by the Borges family. 50 years of experience combined with modern production capabilities and a highly effective logistics management have made us a reliable partner for our customers in the vehicle manufacturing, shipbuilding and machine manufacturing industry.

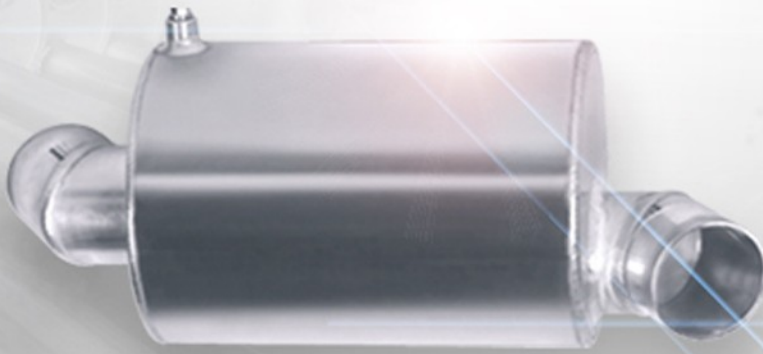

What we stand for

From prototyping to surface treatment of a finished part, we offer a very wide range of production techniques and manufacturing capabilities “Made in Germany”. We are your partner whenever you need high precision logistics in order to ensure effective supply chains.

Should you face unexpected shortages from your regular suppliers, BORGES as your partner can resolve your problems with short-term solutions and speedy delivery, regardless whether your requirements are for series supply, fast prototyping or for testing purposes.

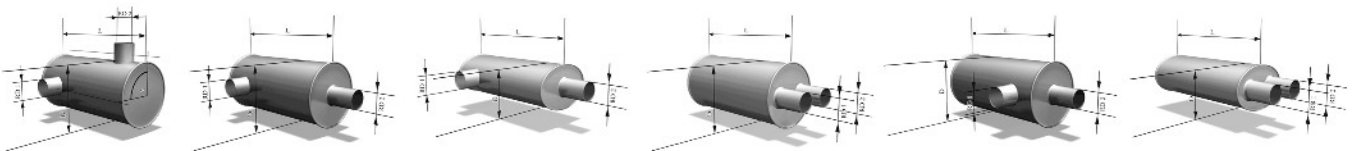

*Sebastian Borges, Graduate Industrial Engineer
Owner & Managing Director*

BORGES exhaust silencers

Exhaust Technology made in Germany starting with prototypes up to serial production.

Especially for OEM requirements our VARIO-system offers us the ability to manufacture round, oval shaped and angular silencers with more than 40 different base shapes and variable body lengths for every kind of vehicle, for various industrial applications and for the shipbuilding industry. Borges silencers can be produced in steel as well as stainless steel.

Fields of application for BORGES silencers:

- silencers for engines up to 2.000 KW
- reflection type and Interference type silencers for suction Diesel engines
- absorber type silencers for turbo engines
- combi type silencers for various applications and rear silencers for SCR-Systems
- silencers for compressed and intake air
- agricultural and construction applications
- special purpose vehicle manufacturing
- On- and Off-Road applications

Why you should choose BORGES silencers.

- tools for more than 40 different ground shapes available - your advantage: tooling costs mostly not necessary, also for individual requirements
- lot size 1 and Prototyping
- high volume series
- short delivery time - start of series in less than 3 weeks possible
- metal working from 0.7 up to 12mm thickness
- different types of steel and stainless steel
- heat resistant surface treatment

BORGES pipes

Production of pipes and complete pipe systems – designed for your individual needs.

We manufacture pipes and complete pipe systems for a wide range of applications. With our machinery and tooling we can produce exhaust pipes, charge air pipes, flexible pipes and cooling water pipes starting from pipe connections to individual and complex systems. Our specialty: cost-optimized series from 1 to ca. 6.000 pcs. per year.

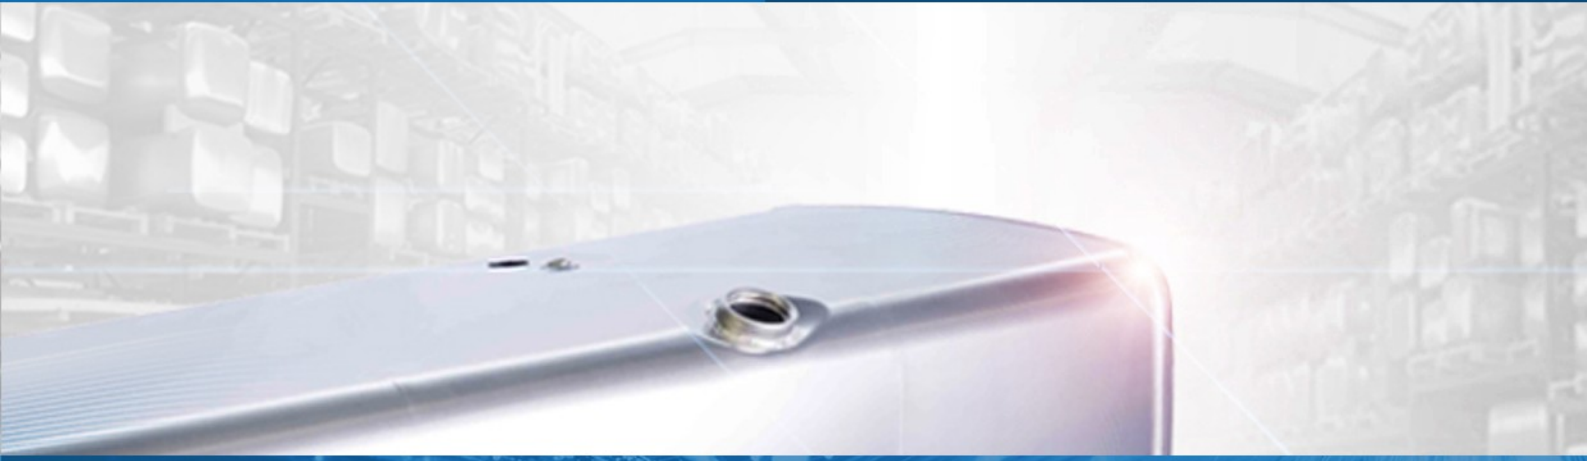

Fields of application for BORGES pipes:

- diameters from 25 to 200 mm
- exhaust pipes, bellows, flexible pipes
- charge air pipes (pressure-tight)
- cooling water pipes
- highly heat resistant pipes up to 1.300°C
- acid-resistant pipes for Ad-Blue/SCR Systems
- noise-reduced pipes
- end pipes, shiny polished
- heat insulated pipes

Why you should choose BORGES pipes.

- huge raw material stocks – more than 60 different diameters always on stock!
- bending tools for more than 40 different diameters - your advantage: tooling costs mostly not necessary
- different bending radii from $R=0.5xD$ to $R=3xD$
- lot size 1 and Prototyping
- medium and higher volume series
- stainless steel, aluminium, steel (aluminized or wet painted)

better.

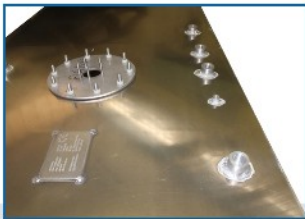

BORGES tanks

BORGES has the tank you are looking for! Immediately on stock or Just-in-Time.

Our VARIOTANK production line enables us to produce your individual tanks with various edge lengths (cap and body) with consistent manufacturing quality in smaller series or as single custom-made part. Special bespoke designed tanks made of steel, stainless steel or aluminium, that meet your requirements are part of our daily business.

Whether it is tanks for commercial, construction or agricultural vehicles or machines, power generators, yachts or boats – BORGES has the tank for you!

Fields of application for BORGES tanks:

- fuel tanks
- hydraulic tanks
- auxiliary tanks
- grease tanks
- water tanks
- special tanks with individual shapes
- mobile or stationary applications
- commercial, agricultural or construction vehicles
- vintage cars
- boats, yachts or ships

Why you should choose BORGES tanks.

- BORGES Premium Quality: Very high stability at comparatively light weight
- contact-corrosion-free welding seams
- product lifetime-optimized choice of materials
- available in aluminium, stainless steel or steel
- surface treatment with primer, wet paint or powder coating available
- highly flexible VARIOTANK production line
- lot sizes starting from 1 unit
- start of series in less than 3 weeks possible
- 100% leakage test according to DIN
- huge variety of mounting and accessory parts available

more flexible.
